Dear Valued Customer:

In order to meet the demands of our customers, Speedline Technologies is continually developing new products & features for our broad product line. As part of our product life cycle planning process, we are continually replacing older equipment with improved product designs. This time-phased process allows us to take advantage of the latest technology available to provide enhanced manufacturing equipment to our customers. As a product moves through this life cycle process, it becomes increasingly difficult to update products due to technology advances or changing vendor support requirements.

As a result, Speedline Technologies has decided to move the Camalot 1824 into the Archive phase of our product life cycle. Under this phase, the 1824 is no longer supported by our field service or technical support organizations. We will continue to offer spare parts for this platform until inventory is depleted.

To replace the 1824 platform, we offer the Camalot 1414. The 1414 was developed to reduce total cost of ownership, and includes advanced pump technology and manual or auto correction vision. If you are interested in learning more about this dispensing system, please contact your local Speedline Technologies representative or visit us at www.speedlinetech.com.

Sincerely,

A handwritten signature in cursive script that reads 'Hugh Read'.
