September 10th 2007

Dear Valued Customer:

In order to meet the demands of our customers, Speedline Technologies is continually developing new products & features for our broad product line. As part of our product life cycle planning process, we are continually replacing older equipment with improved product designs. This time-phased process allows us to take advantage of the latest technology available to provide enhanced manufacturing equipment to our customers. As a product moves through this life cycle process, it becomes increasingly difficult to update products due to technology advances or changing vendor support requirements.

As a result, Speedline Technologies has decided to move the Camalot 4398 series (-1, -2, and -3) into the Archive phase of our product life cycle on March 1st 2008. Under this phase, the Camalot 4398 series (-1, -2, and -3) are no longer supported by our field service or technical support organizations. We will continue to offer spare parts for these platforms until inventory is depleted.

We apologize for any inconvenience this may cause your organization. If you are interested in learning more about Speedline products, please contact your local Speedline Technologies representative or visit us at www.speedlinetech.com.

Sincerely,

A handwritten signature in black ink, appearing to read 'Hugh Read', written in a cursive style.
