July 24, 2008

Dear Valued Customer:

In order to meet the demands of our customers, Speedline Technologies is continually developing new products & features for our broad product line. As part of our product life cycle planning process, we are continually replacing older equipment with improved product designs. This time-phased process allows us to take advantage of the latest technology available to provide enhanced manufacturing equipment to our customers. As a product moves through this life cycle process, it becomes increasingly difficult to update products due to technology advances or changing vendor support requirements.

As a result, Speedline Technologies has decided to move the Electrovert UPK 600 (MO Built) into the Archive phase of our product life cycle on July 24, 2008. Under this phase, the UPK600 is no longer supported by our field service or technical support organizations. We will continue to offer spare parts for this platform until inventory is depleted.

We apologize for any inconvenience this may cause your organization. If you are interested in learning more about Speedline products, please contact your local Speedline Technologies representative or visit us at www.speedlinetech.com.

Sincerely,

Greg Calvo
Electrovert Product Manager
