Dear Valued Customer:

In order to meet the demands of our customers, Speedline Technologies is continually developing new products & features for our broad product line. As part of our product life cycle planning process, we are continually replacing older equipment with improved product designs. This time-phased process allows us to take advantage of the latest technology available to provide enhanced manufacturing equipment to our customers.

Speedline Technologies has stopped manufacturing the MPM UP2000 Elite automatic printer. Although we will no longer manufacture these systems, we will continue to provide the same high quality of service that our customers have come to expect from us. We will continue to provide technical support, refurbishment, and spare parts for the UP2000 Elite platform in accordance with best industry practices.

As an alternative to the UP2000 Elite, Speedline currently offers the fully automatic MPM Momentum® Printer. Momentum incorporates proven core technologies along with patent-pending designs enabling it to provide high yields even with today's toughest ultra-fine feature and lead-free printing requirements. Features such as CANopen Control architecture, improved alignment and print deposition accuracy and repeatability, broader inspection capabilities including BridgeVision® and StencilVision™, graphical Windows® based Benchmark™ software, and fast setup and changeover utilities make the Momentum the industries price / performance leader. If you are interested in learning more about our new Momentum printer, please contact your local Speedline Technologies representative or visit us at www.speedlinetech.com.

Sincerely,

A handwritten signature in black ink that reads 'Wayne A. Platz'.
