September 12, 2007

Dear Valued Customer:

In order to meet the demands of our customers, Speedline Technologies is continually developing new products & features for our broad product line. As part of our product life cycle planning process, we are continually replacing older equipment with improved product designs. This time-phased process allows us to take advantage of the latest technology available to provide enhanced manufacturing equipment to our customers.

As a result, effective January 4th 2008, Speedline Technologies will stop manufacturing the Camalot 1818. Although we no longer manufacture this system, we will continue to provide the same high quality of service that our customers have come to expect from us. We will continue to provide technical support and spare parts for the Camalot 1818 series in accordance with best industry practices.

To replace the Camalot 1818, we recently introduced the Camalot FX-D. The Camalot FX-D was developed to offer increased performance and greater flexibility at a lower cost. If you are interested in learning more about our new dispensing system, please contact your local Speedline Technologies representative or visit us at www.speedlinetech.com.

Sincerely,

A handwritten signature in black ink, appearing to read 'Hugh Read', written in a cursive style.
