March 1, 2009

Dear Valued Customer:

In order to meet the demands of our customers, Speedline Technologies is continually developing new products & features for our broad product line. As part of our product life cycle planning process, we are continually replacing older equipment with improved product designs. This time-phased process allows us to take advantage of the latest technology available to provide enhanced manufacturing equipment to our customers. As a product moves through this life cycle process, it becomes increasingly difficult to update products due to technology advances or changing vendor support requirements.

As a result, Speedline Technologies has decided to move the Camalot 3700 into the Archive phase of our product life cycle on August 1, 2009. Under this phase, the 3700 will be supported through our Field Service and Technical Support organizations on a “best effort” basis. We will continue to offer spare parts for this platform until inventory is depleted and no longer available. Engineering and software support will not be available.

If you are interested in learning more about our dispensing systems, please contact your local Speedline Technologies representative or visit us at [www.speedlinetech.com](http://www.speedlinetech.com)

Sincerely,

A handwritten signature in black ink that reads 'Hugh Read'.
